DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Coffee et al.

Coffee et al. discloses a dispensing device having a reservoir 30, a voltage source 20, comminution site 41, discharge electrode arrangement 50, control circuit 21, and a resistor as shown in figure 14.

Response to Arguments

3. Applicant's arguments filed August 06, 2004 have been fully considered but they are not persuasive. The statement of intended use carries no patentable weight. All the limitations that follow the expression "configured to" have not been positive recited and have been treated by the examiner as the intended use expression. Therefore, the high voltage power supply of Coffee et al. is capable to be configured to supply a variable output signal in response to a feed back signal.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dinh Q. Nguyen whose telephone number is 571-272-4907. The examiner can normally be reached on Monday-Thursday 6:00-4:30.
